Fold all cards along score lines and reinforce creases with a bone folder. Before making crease, check to make sure that all edges are aligned. The edges of most finished cards, panels and die cuts have been colored with black or brown ink. This step is optional, and the directions to ink edges are not included below. For a softer look, ink with a sponge or stylus tool with blender tip. For a bolder effect, ink directly from the pad onto the card.

If you do not have the item needed to complete the card as it is shown, simply eliminate the step, or modify it to use the items that you have in your stash.
